KUSASA CHEM POOL - CEMENT BASED PAINT

GENERAL DATA

Description:

Chem Pool is a 2 pack system comprising of a highly re-enforced, pigmented, white portland cement based product that is mixed with Chem Add to form a brilliant white smooth coating that is applied onto marbleite pool surfaces that have become rough and stained. Chem pool is applied using a lambs wool roller and/or paint brushes in exactly the same manner as a convention paint.

Recommended Use

Chem Pool is applied on the conventional gunite/marblelite structed pool in instances where the marbleite has become rough (through age) and stained. The application of Chem Pool will render to pool surface smoother and water resistant.

TECHNICAL DATA

Bulk Density

1.5

Volume Solids:

Powder based
